

WHERE IS GOD?

God's inside the heart of a volcano because he's dangerous but warm

Where is God?

God's inside our fingerprints because he's unique and creative in every way.

Where is God?

Up high on Jupiter speaking to other immortals he knows.

Where is God?

Dancing in the mist as we are going home.

Where is God?

In the heart of every vicious animal we know, he's in every baby animal teaching them to survive.

Where is God?

God's in the darkness reading this poem over and over again!
